

Aveltra Technologies - IT Security & Acceptable Use Policy

Policy ID: IT-SEC-004 Effective: 1 January 2025

1. Passwords & Authentication

Passwords must be at least 12 characters and include letters, numbers and symbols. They must be changed every 90 days and never reused across systems. Multi-factor authentication (MFA) is mandatory for all email, VPN and cloud-console access.

2. VPN & Remote Access

All access to internal systems from outside the office must go through the company VPN. Split tunnelling is disabled. VPN credentials must not be shared. Report a lost or stolen device to the IT Help Desk within 2 hours.

3. Acceptable Use

Company devices are for business use. Installing unapproved software, disabling antivirus, or connecting personal USB storage to company laptops is prohibited. Personal use of email and internet must be reasonable and lawful.

4. Data Classification & Handling

Data is classified as Public, Internal, Confidential or Restricted. Confidential and Restricted data must be encrypted at rest and in transit and may never be stored on personal devices or public cloud drives.

5. Phishing & Incident Reporting

Do not click links or open attachments from unknown senders. Report suspected phishing using the 'Report Phish' button in the mail client. Any suspected security incident must be reported to security@aveltra.example immediately.
